

Carl Zeiss SLR Lenses

**Distagon T*
2/28**

**The Famous
High-speed Artist**

This moderate wide-angle lens is based on the renowned Distagon design of the 1980s for the Contax system. The modern **Distagon T* 2/28** has been optimized with current, higher performing and eco-friendly glass and incorporates a floating lens element design to optimize image quality across the entire focusing range. A compact lens for its speed, the fast f/2 aperture allows for hand-held photography under difficult lighting conditions and is well-suited for landscape, nature and commercial photography. The **Distagon T* 2/28** is available with the F bayonet (ZF) and K bayonet (ZK) lens mounts and is designed for use with full-frame SLR and DSLR cameras. Combined with a DSLR with a 1.5 crop factor, the lens has an effective focal length of 42 mm.

Distagon T* 2/28

We make it visible.

1 Takes captivating wide-angle pictures, even under difficult lighting conditions.

2 The integrated floating elements design ensures consistent performance at any distance.

3 Optimal control of glare and stray light ensures brilliant and brightly colored images.
